CLEANQUOTE STUDIO

Commercial Cleaning Quote System

A practical pricing and proposal system built around your cleaning business.

This overview is for owners of small commercial cleaning businesses who are considering the $199 Custom Setup. It describes the quoting and proposal workflow CleanQuote Studio prepares for your company. It is not a sample quote for one of your cleaning clients.

The setup is built from your labor costs, payroll burden, operating expenses, and target profit, then delivered as editable files you use in your own process. It is a customized quoting workflow, not a generic spreadsheet sold on its own.

$199 One-Time Setup

No recurring monthly or annual subscription is required for the delivered tools.

What you receive

These are the files prepared for your business. Website demos, including the on-page client proposal and the product video, are CleanQuote Studio display materials. They are not extra files in the setup.

01 **Custom Pricing Calculator**
An Excel workbook set up around your labor rates, payroll burden, supplies, travel, overhead, and target profit.

02 **Client Proposal Template**
An editable Word template for presenting service scope, schedule, and price to your own prospective cleaning client.

03 **Sample Client Quote (PDF)**
One finished example of how a completed proposal can look when you send it to a client. Names and prices in examples are illustrative.

04 **Setup guidance**
Instructions and a walkthrough for using the calculator and proposal template.

Ongoing quoting, lead generation, a custom website, and automated document generation are not included unless agreed separately by email. This overview does not set a delivery date or a number of revisions.

Why CleanQuote Studio

A. One-Time Payment

$199 one-time setup fee. No recurring monthly or annual subscription is required for the delivered tools. This does not include free lifetime upgrades, free lifetime support, or a guarantee of permanent compatibility.

B. Built Around Your Business

The calculator is set up from your labor costs, payroll burden, operating expenses, and target profit. It is customized for your business, not issued as a generic template.

C. Practical, Editable Tools

You receive editable Excel and Word files you can use inside your own quoting process.

D. A Complete Quoting Workflow

The setup connects cost estimating, price setting, and a professional client proposal. It does not add automated quoting, a CRM, customer management, or automatic document generation.

How the approaches differ

A comparison of working methods. It does not name other products, and it does not claim that every software product uses a subscription or that any market share, price, or feature comparison has been verified.

Traditional manual quoting	Subscription-based software	CleanQuote Studio
• Estimates often rely on memory or inconsistent spreadsheets. • Cost categories and profit assumptions may be overlooked. • Proposal documents may lack consistency.	• May involve recurring monthly or annual fees. • May require adapting workflows to a platform.	• One-time $199 setup fee. • Customized around the business's own cost assumptions. • Editable spreadsheet and proposal files. • No recurring subscription is required for the delivered tools.

How we work

1. Share Your Business Information

Labor rates, payroll burden, operating costs, target profit, and the service pattern you usually quote.

2. Review Your Pricing Assumptions

We review the numbers you send and the assumptions that should drive the calculator.

3. Customize Your Quote System

We prepare the calculator and proposal files around those assumptions.

4. Receive Your Files and Setup Guidance

You receive the files and guidance for using them.
